

NASHUA ARTS COMMISSION

NASHUA ARTS COMMISSION
Tuesday, June 9th at 8am
3rd Floor Auditorium
Nashua City Hall
229 Main Street, Nashua NH 03060

AGENDA

- 8:00am Call To Order
 Roll Call of Members
 Recognition of Carol Robey
 Approval of [Minutes May 2026](#)
- 8:05am Old Business
- Update Summer Music Series (Faith)
 - Update on Renaissance Park Mural-see packet (Laurie)
 - Update on Arts Kiosk Project (Jenn/Liz)
- 8:20am New Business
- 8:20am: ArtCity Presentation (Kori "Q" Thomas, Quest Nine)
 - 8:40am: Arts Commission Officer Elections (Lindsay)
 - 8:50am: ArtCity Discussion
- 9:05am Call To Artist Notices (*if any*)
 Upcoming Event Announcements (*if any*)
 Open Discussion for Commissioners (*if time allows*)

Next Meeting: **Tuesday, August 11th, 2026 at 8am** in City Auditorium of Nashua City Hall

Reminder: Summer Meeting Schedule

- **July 14th: NO Arts Commission Meeting**
- **August 11th:** YES, tentative meeting, depending on available quorum.
 - *Please notify Lindsay NOW if you have a planned vacation so we can adjust the schedule as needed*

Written in Granite: Mural to be painted in Nashua

Artist Graham Carraway's work to include local heritage

By Joan T. Stylianios | Sun Columnist
The Sun, Published February 16, 2026

It doesn't matter if you live in a small town, a mid-sized city like Nashua or a metropolis. Public murals can bring a community to life and capture something special that underlies the human experience.

Artist J. Graham Carraway was born and raised in Mississippi and lives in Denver, Colorado, where he has refined his art career. He and his wife, Olivia, are well-travelled throughout the United States. Mural painting is one of his favorite forms of community expressions, and he's excited to begin creating a mural masterpiece for Nashua.

Nashua Mayor Jim Donchess and the Board of Aldermen recently gave the thumbs up to a \$105,000 awarded to Carraway to paint a large-scale public mural along the north side of the Water Street Bridge, as part of the newly developed downtown Riverwalk and Renaissance Park project.

This mural will celebrate Nashua's heritage, including its proud French-Canadian roots and help activate the Riverwalk as "a vibrant and welcoming public space."

Carraway was chosen from a field of 21 artists by a committee of community members and the Nashua Arts Commission. The applicants all submitted beautiful work, but according to Liz Hannum, the city's EDD, Carraway's artistic proposal went a step beyond in how he would uniquely embody Nashua's heritage and history with its living and future generations and include a mural workshop for local art students to engage with the project.

From what I understand, Carraway will paint a large piece of real estate, so to speak. That is no easy task, but it allows him much artistic freedom to tell Nashua's story along the bridge wall in Renaissance Park, whose former brick mill industrial buildings grace the background by the swiftly moving Nashua river.

Carraway will weave a colorful span of layered images along the 70-foot concrete wall, which ranges in height from 5 to 20 feet high. Carraway was gracious with his time to answer a few questions I had about the public mural where he will leave his incredible mark. He couldn't give away his plans, but he tells me he's excited to get going in the Gate City, where he will spend quality time observing the community and seeing what Nashua is all about.

V8 Series: Outdoor Touch Screen Digital Signage

Explore the Robust Features of V8 Series: Outdoor Touch Screen Digital Signage

DISCLAIMER: All kiosk designs, specifications, features, and related data are subject to change without prior notice to enhance functionality, reliability, or aesthetics, or to accommodate custom requirements. Final delivered product may vary from initial concept renderings or proposals.

Field-Proven. Climate-Tested. Deployment-Ready

No lab simulation can replicate the challenges of the real world and that's where the V8 Series truly shines. With a certified **IP65 Ingress Protection Rating** and rigorous environmental testing, the V8 Series stands up to extreme heat, freezing cold, heavy rain, high winds, and direct sunlight. From the icy winters of Minnesota to the blistering heat of Phoenix, this display delivers consistent, high-performance operation wherever it's deployed.

Engineered for Extreme Climates

At Eflyn, we understand that outdoor digital signage must perform reliably in every climate. That's why the V8 Series Outdoor Touch Screen Displays are engineered to withstand extreme temperature swings without compromise.

With an impressive **operating range of -30°C to 50°C (-22°F to 122°F)** and **humidity tolerance from 5% to 95%**, the V8 thrives where others falter. From scorching heat waves in the Southwest to deep freezes in the North, your content stays clear, responsive, and dependable, rain, snow, or sun.

Ambient Light Sensing for Optimal Performance

The V8 Series features **built-in ambient light sensors** that automatically adjust screen brightness for optimal visibility day or night.

Whether under direct sunlight or in low-light conditions, your content stays clear and easy to read at all times.

This **intelligent brightness control** ensures peak performance and a seamless viewing experience without manual intervention.

Powered by Intel®. Driven by Windows® 11 Pro.

The V8 Series comes equipped with a **built-in Intel® PC** (single unit/ dual units based on variant) running **Microsoft Windows® 11 Pro Operating System**, giving you the freedom to run your own applications without the need to learn a new system.

Whether it's custom software or browser-based platforms, Windows® 11 Pro ensures seamless compatibility, enhanced security, and a familiar user experience; making deployment and management easier than ever.

Accessibility Built Into Every Detail

At Eflyn, inclusivity is part of innovation. That's why the V8 Series is engineered with a **fully ADA-compliant design**, ensuring it's accessible, intuitive, and easy to use for everyone, including individuals with mobility, visual, or physical disabilities.

From screen height and angle to touch responsiveness and interface layout, every detail is carefully considered to meet **ADA standards**.

On Site Installation Services

We provide **complete installation services** through 100+ local partner firms with 500+ qualified labourers.

Countdown before
each photo.

The Social BoothPro©
is a fully-automated,
Do-It-Yourself system for
photo-taking.

Choose your own
custom frames, filters
and props to stylize your
photos.

Various Activations of the SpinToWin© App on Eflyn Touch Screen Digital Signage

Add Eflyn SocialBooth Pro©
and convert interactive digital signage to a
fully functional photo booth.

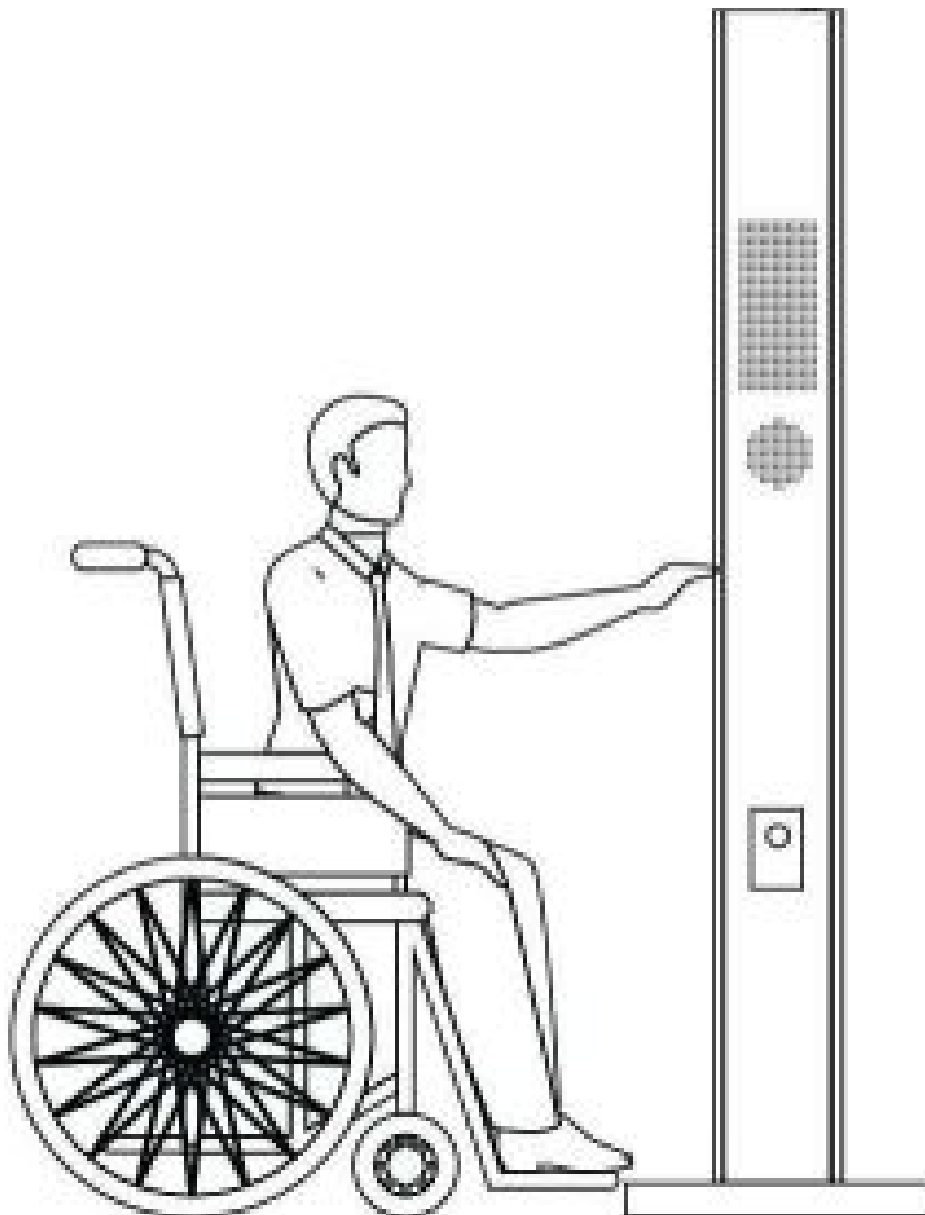

EFLYN | ADA Compliance & Accessibility

ADA Compliance and Accessibility:

Design Guidelines for Kiosks and Digital Signage

The **Americans with Disabilities Act (ADA)** applies to all local, county, state, and federal government agencies, and also covers companies with 15 or more employees.

As a world leader in digital kiosk manufacturing and touchscreen software, Eflyn has developed a Hardware/Software hybrid framework to ensure kiosk installations are ADA compliant for clients who must comply with these requirements.

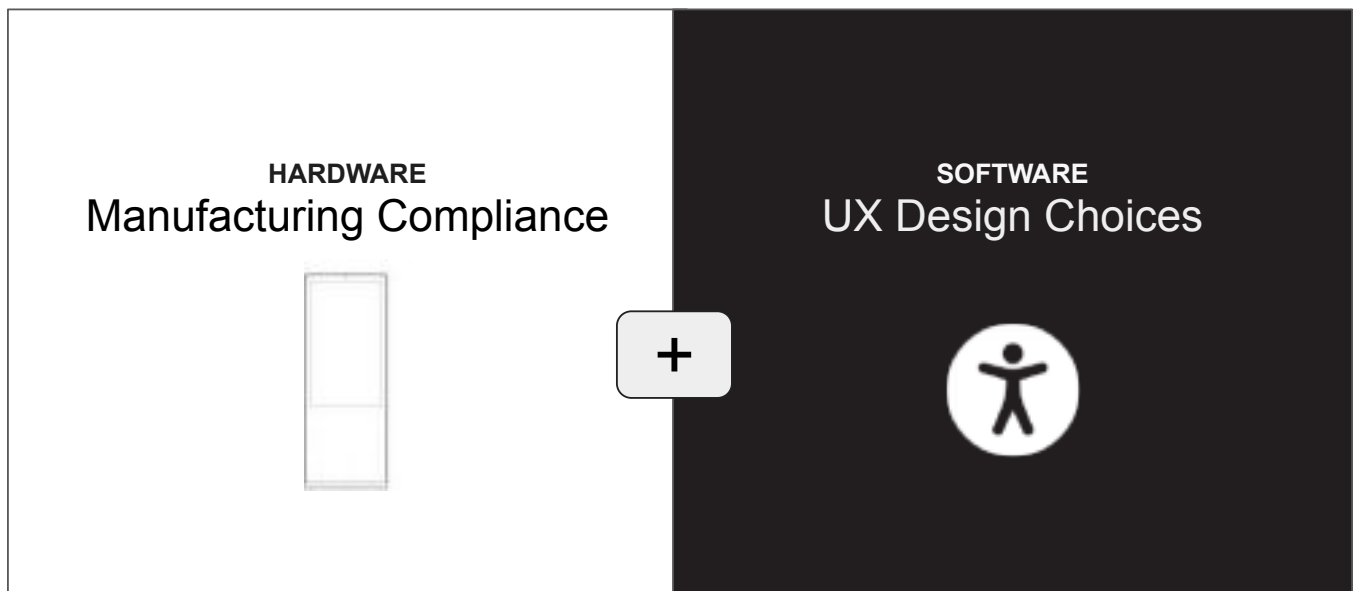

Our Hybrid Approach to ADA Compliance for Kiosk Machines

Our Touch Screen Interactive Kiosks conform to ADA and European Telecommunications Standards Institute guidelines, potentially with a secondary or alternative navigational scheme.

Advantages of the Hybrid Approach:

- Less part maintenance compared to physical ADA-compliant user controls.
- Lower-cost hardware.
- Sleek, elegant hardware design.
- Adaptable and upgradable UX through software patches.
- Customizable software controls tailored to specific applications, avoiding limitations imposed by physical hardware constraints.

Hardware Considerations for ADA Compliance

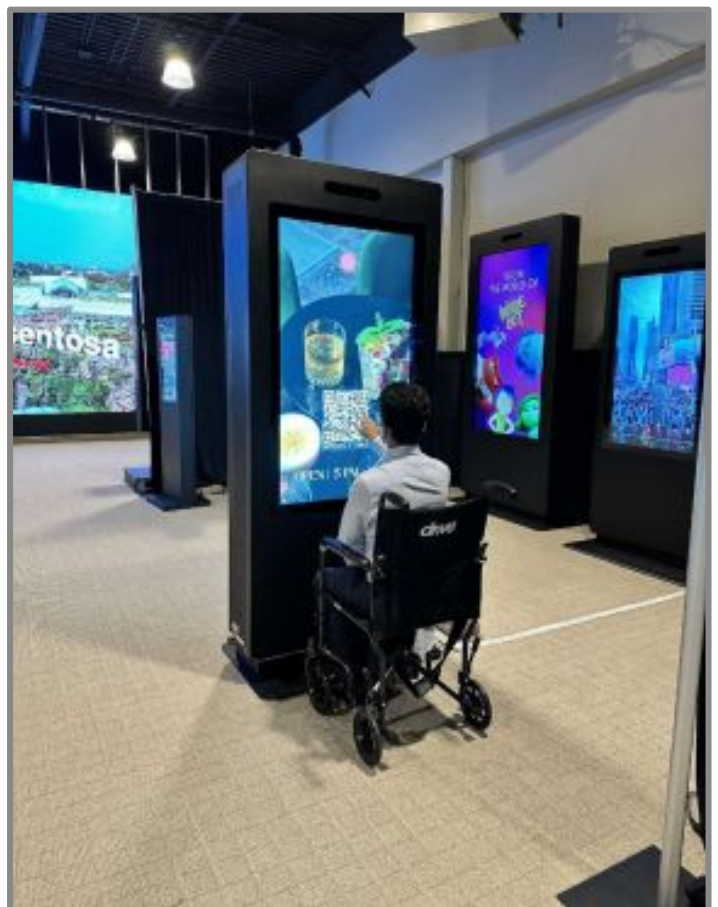

The Accessibility Requirements for ICT Products and Services, as outlined by the European Telecommunications Standards Institute (ETSI), specify a minimum reach height of 15 inches (380 mm) and a maximum reach height of 48 inches (1220 mm) for Unobstructed Forward Reach.

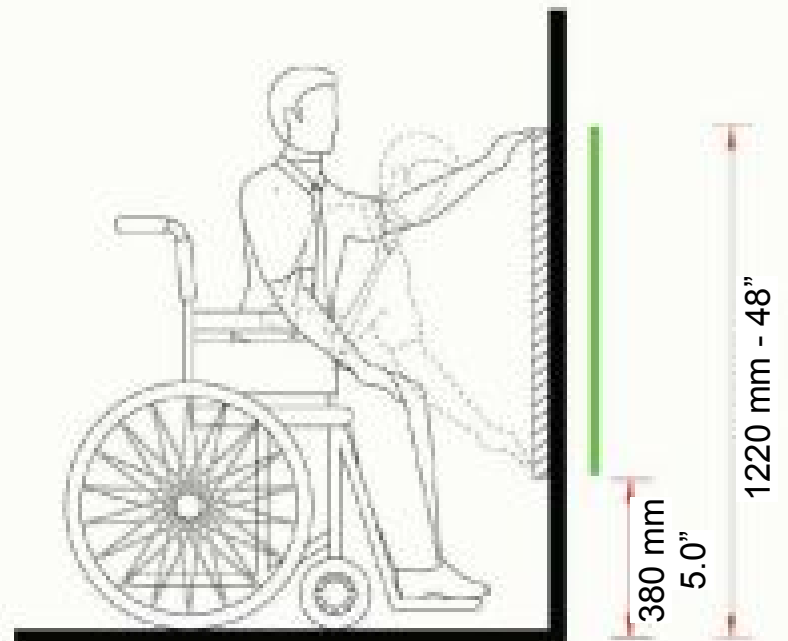

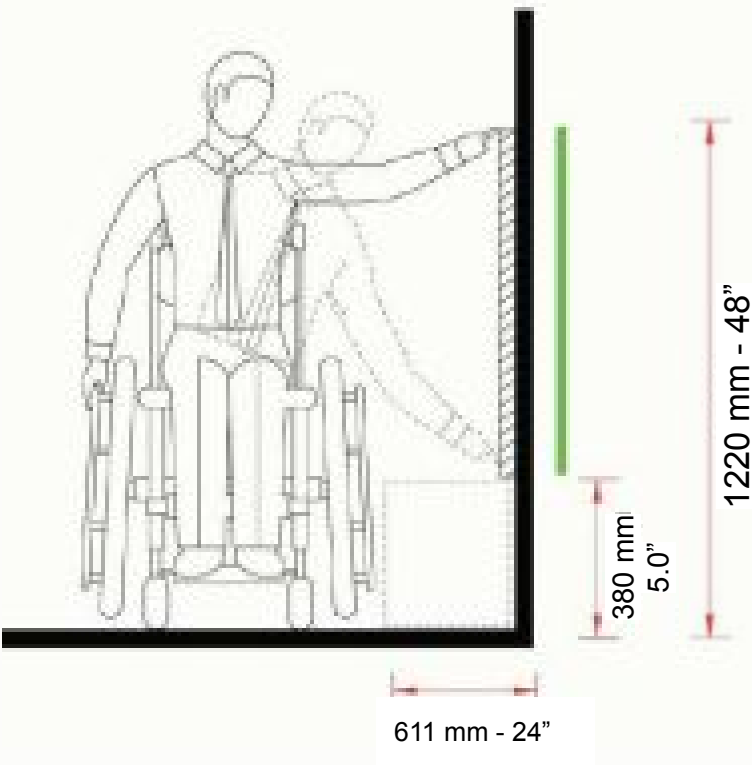

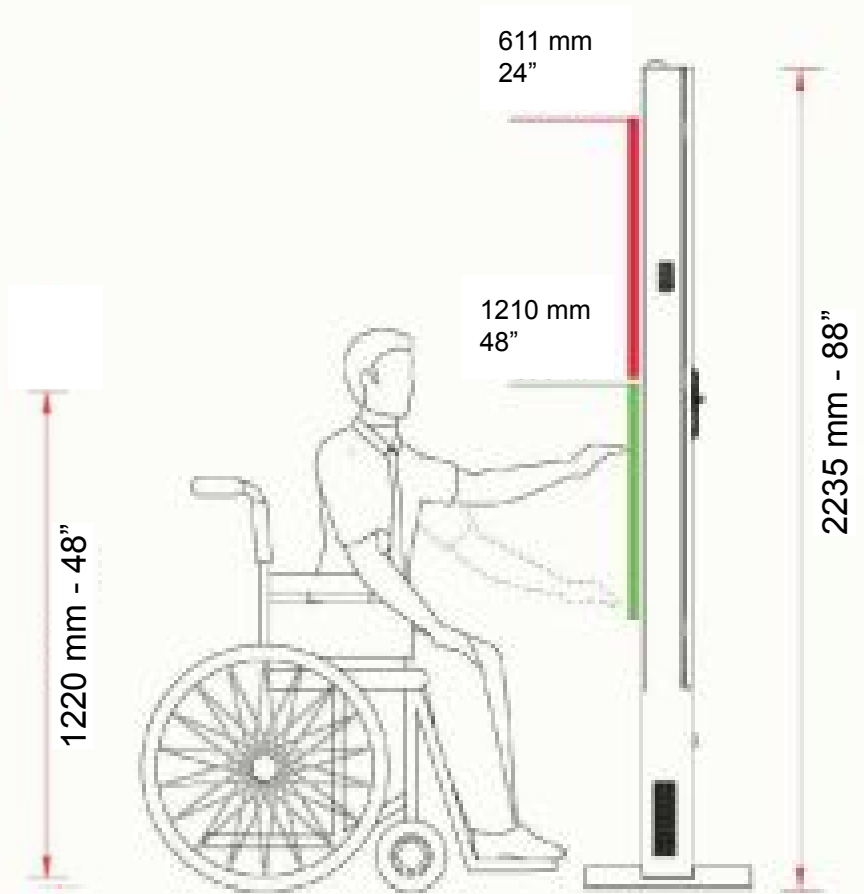

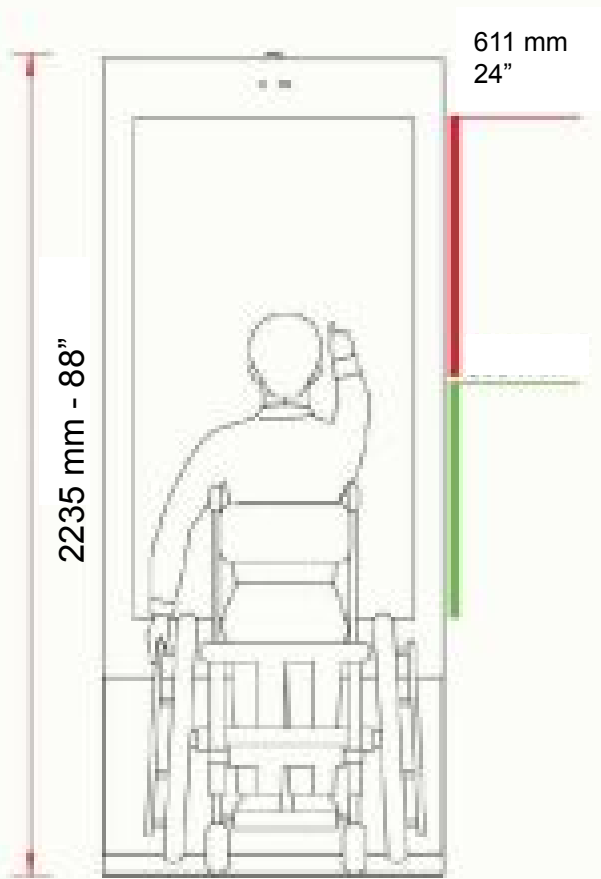

Our kiosk model aligns perfectly with these standards:

- The base-to-screen height of 39 inches ensures the interactive display falls well under the 48-inch ADA limit for reachability, making it fully compliant with ADA guidelines.
- The slim base design provides unobstructed access to the kiosk for individuals using wheelchairs or other mobility aids.

Additionally, the kiosk features built-in speakers and a microphone, enabling further accessibility enhancements through customizable software solutions, such as audio output for the visually impaired or voice recognition for hands-free operation.

Eflyn 55" Outdoor Kiosk
ADA Compliant with Accessible Low Screen Design (See Photo for Perfect User Accessibility)

UX Design Choices for ADA Compliance

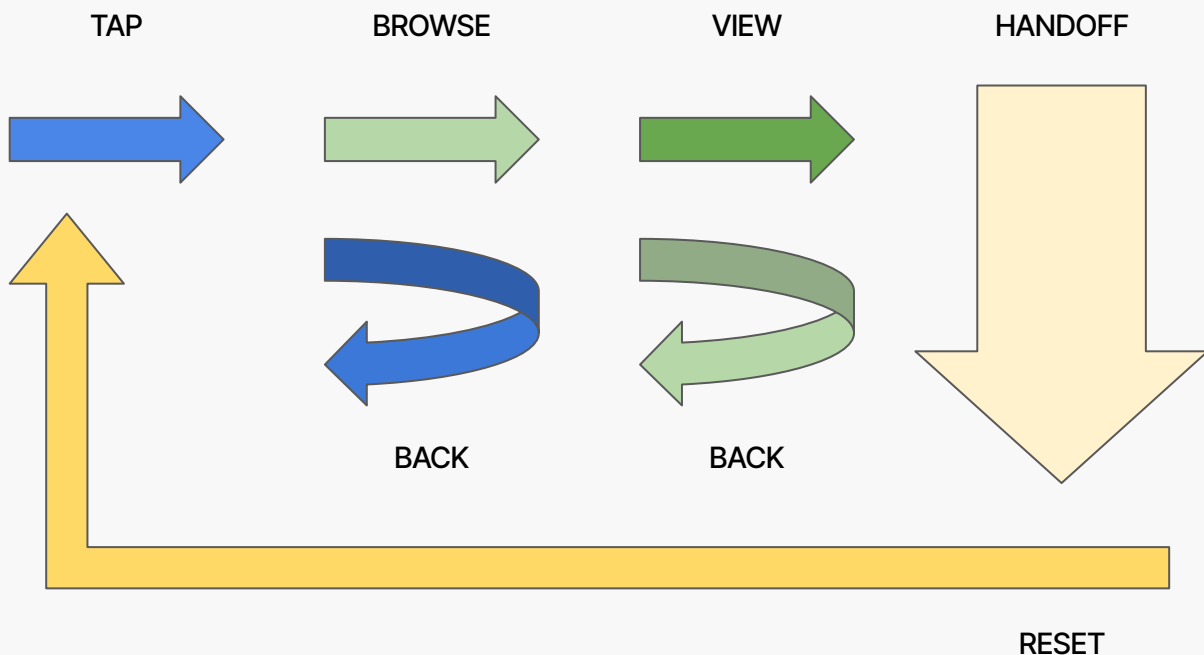

To enhance accessibility and user experience, **all functionalities of the application follow a “user loop” design**. This approach ensures a self-referential journey, allowing users to easily navigate back to any previous function.

This design is preferred over traditional “branching” user interfaces because it:

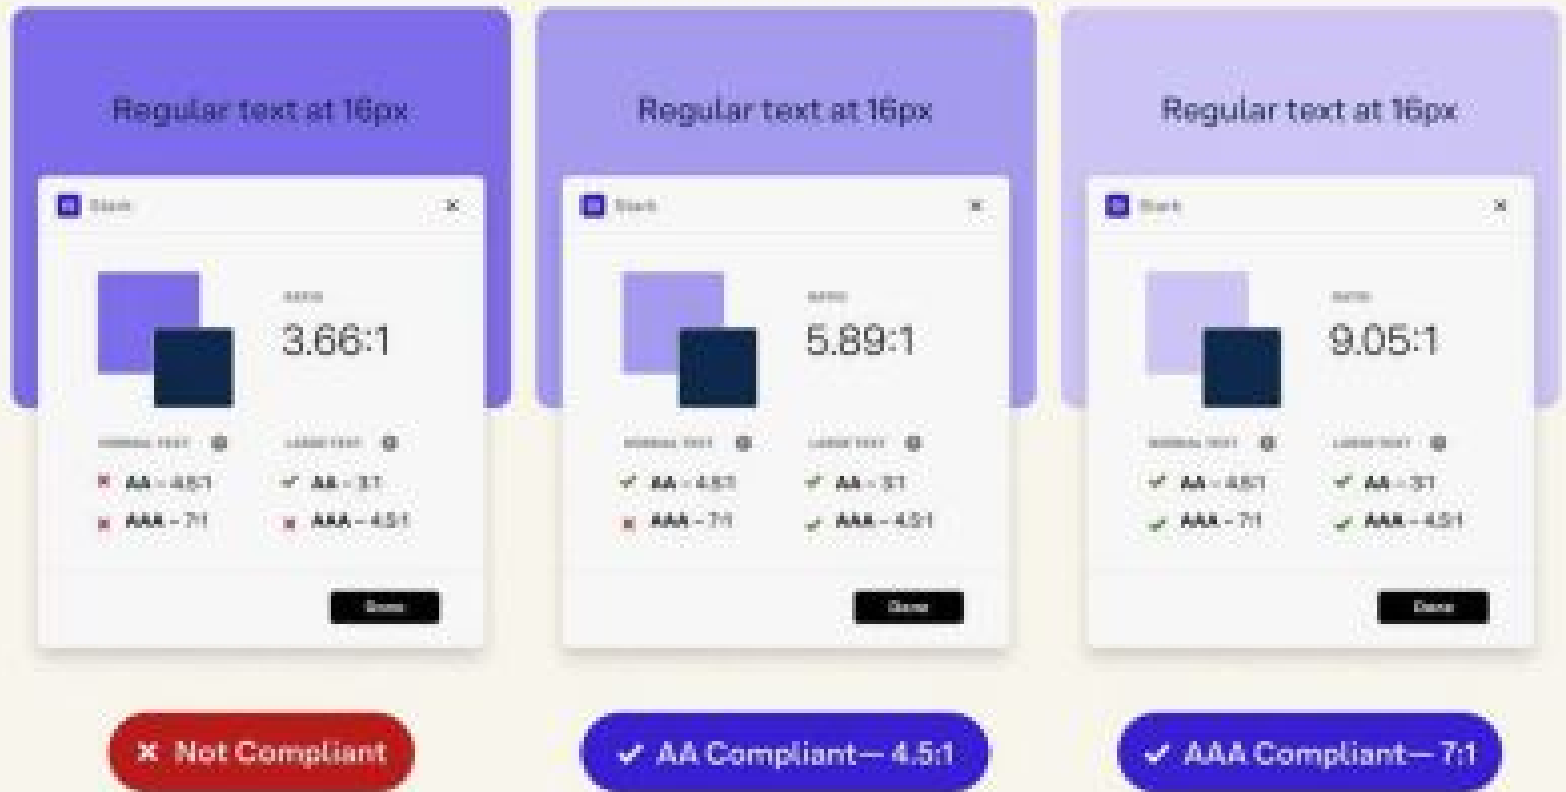

- **Reduces Complexity:** Simplifies navigation, making it less overwhelming for users.
- **Improves Intuition:** Helps users grasp the interface quickly without additional guidance.
- **Enhances Learning Curve:** Enables users to master the application faster, creating a more pleasant and inclusive experience.

By prioritizing simplicity and intuitiveness, the user loop design aligns with ADA principles, ensuring an accessible and seamless journey for all users.

Sample Circular UX Flow

UX Design Choices for ADA Compliance

High Contrast

Software buttons and controls should be presented in stark contrast to background graphics. Also high-contrast colors are preferred to help vision-impaired users distinguish between active screen areas and passive ones.

All Eflyn user interfaces are manually and automatically assessed to achieve between AA and AAA compliance for contrast and readability.

UX Accessibility Features and Comparison

We take careful consideration to maximize accessibility of all Eflyn kiosk applications in accordance with ADA and WCAG. By utilizing a combination of UI modifications and accessibility controls we are making Eflyn kiosk more welcome and inclusive of all types of users.

Eflyn Unique Selling Points (USPs)

State-of-the-Art Display & Innovation Center

Eflyn's Innovation Center features advanced display technology and fosters innovative solutions.

Extensive Experience Integrating the Web with Kiosks

For over 20 years Eflyn has been a leader in building and integrating web platforms, CMS and ecommerce systems with kiosks. Eflyn has developed, delivered and continues to maintain 100s of custom kiosk applications across industries.

SOC 2 Compliance

Eflyn has obtained a SOC 2 compliance. Our platforms adhere to stringent security and operational standards, and attaining SOC 2 compliance will further enhance trust and confidence in our solutions.

Comprehensive End-to-End Solutions

Eflyn is among the few companies offering complete solutions, including customized hardware, in-house assembly, development, an innovation center, lead engineers, a programming team, graphic designers, and 500 contractors across North America.

Dedicated Testing Lab

Eflyn's innovation center includes a dedicated lab for testing custom applications before launch. Our dedicated Kiosk Labs are unique in that we do end-to-end solution testing on the actual release hardware and real time video collaboration with your key project stakeholders to ensure complete satisfaction and reliability before launch.

Advertising Platform

The Eflyn Kiosk Platform comes with media tools to manage digital ad opportunities across kiosk apps and experiences, content pipelines, scheduling and comprehensive reporting for advertisers.

Full Developer Program

Eflyn provides a comprehensive developer program with API access for further customization needs.

Complete Analytics Suite

Eflyn Kiosks have built-in recording for comprehensive metrics on usage, environment, behavior and more. Understand how your kiosks and digital displays are serving users with automated insight reports.

Monitoring and Kiosk Management

The Eflyn system can facilitate content design, app management, kiosk deployment and remote management all in one platform. You can remotely troubleshoot kiosks, view the screen in realtime and remotely send commands to the hardware.
